MEMORANDUM FOR: Chief, Plans and Programs Staff, OL

25X1 FROM :
Chief, Printing and Photography Division, OL

SUBJECT : Agency Long-Range Planning and
Phase IV Support Capabilities (S)

REFERENCE : Multiple Addressee Memo From C/P&PS/OL,
dtd 5 Oct. 82, same subject

1. Printing and Photography Division's (P&PD) analysis of the material covered by the referent yielded no operational requirements for which P&PD can project specific support capabilities. It should be noted; however, that the personnel increases cited in the material provided under the referent are bound to have some impact on the requests for services provided by P&PD. In that there is no direct correlation between an increase in Agency personnel strength and requests for printing and photographic support, we can only predict, based upon limited previous experience, that P&PD will have to respond to a 10 to 15 percent across the board increase in requests for service.

2. It is our belief that the availability of the funding for the long-term development of P&PD's already begun plant recapitalization and modernization will enable the Division to respond well to this predicted increase in requests for service, and that P&PD will possess sufficient reserve capability for any reasonable contingency.

3. Please call if you
require any additional information.
